

StorageGRID Administration

Abstract

This course is a comprehensive coverage of NetApp® StorageGRID® administration. You learn how to configure, monitor, maintain, and expand a StorageGRID system. This course builds on the concepts in the *StorageGRID Fundamentals* course. This course is complementary to the *Installing StorageGRID* course.

Objectives

This course focuses on enabling you to do the following:

- Use the StorageGRID Grid Manager to monitor and manage a StorageGRID object-based storage solution
- Create and manage storage tenant accounts, groups, and users
- Configure information lifecycle management (ILM) rules and policies
- Monitor StorageGRID system activity
- Configure and manage email notifications and custom alarms
- Integrate the StorageGRID solution into your data fabric

Prerequisites

StorageGRID Fundamentals

Delivery Type

Instructor-led training (ILT)
Virtual instructor-led training (VILT)

Duration

3 days

Audience

NetApp customers, partners, and employees

Training Units

36

Language

English
